-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7,11,12,16-19, drawn to a screening method using a polypeptide.

Group II, claim(s) 1,6,8-12,16-19, drawn to a screening method using a nucleic acid.

Group III, claim(s) 13-15,20-22, drawn to a method of treatment with a polypeptide binding agent.

Group IV, claim(s) 20-22, drawn to a method of treatment with a nucleic acid binding agent.

Group V, claim(s) 23-25, drawn to a method of diagnosis.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons. The claims lack a special technical feature because claim 20 is obvious over the prior art cited on 210 (EDAN 371P (1/07/05) and filed with the instant application). Mizuta et al. disclose that RAD51 interacts with p53 (see abstract) and RAD51 interacts with RAB163/22 (see page 6927, first complete paragraph). Sherr et al. (US 6,407,062) discloses that agents that bind a molecule that interacts with p53 can be used to treat disease (see column 35 wherein ARF-p19 interacts with p53). It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to have created the claimed invention because Mizuta et al. disclose that RAD51 interacts with p53 (see abstract) and RAD51 interacts with RAB163/22 whilst Sherr et al. (US

discloses that agents that bind a molecule that interacts with p53 can be used to treat disease.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ron Schwadron, Ph.D. whose telephone number is 571 272-0851. The examiner can normally be reached on Monday-Thursday 7:30-6:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Larry Helms can be reached on 571 272-0841. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
